

# HYP-101: TESTIMONIALS

As a 10th grader, who is now deploying Truffle cryptocurrency web apps, I feel immensely proud of the headstart that this programme has given me. While my classmates are preparing to tackle a board exam that asks them to name 5 browsers, I am making my own Chrome extensions. Would recommend this to everyone.

-Alok Mahajan, 10th grader

Codevita Liive simply makes it so easy for everyone. Making my own hypercasual game using SFML and putting it on my resume helped me land my first C++ internship, that too applying externally!

-Advait Chatterjee, FY B.Tech CSE student

I used to show off getting 100 in my 10th board FIT exam but it's almost like Codevita Live has given me a super-soldier serum. The programme has enabled me to have a better profile in terms of projects now from what my cousin had as a B.Tech fresher from an NIT.

**-Manohar Saha,11th grader**

More than the programme curriculum, the programme has given my ward the confidence to explore so much that is there to computer science that one would stumble across in the course of his/her normal studies. I am pretty sure by the time he graduates, he would have a profile 3 times better than most of his peers. Hats off to Codevita Live for pulling this off!

**-Babita Sahu,mother of Naman Sahu,7th grader**
